CASE STUDY · SAMPLE PROJECT, SIMULATED DATA

Weekly Store Report on Autopilot

A fictional home and kitchen retailer with 4 stores. Every Monday each store sent its sales file in a different format, and someone spent half a day copying them into one report.

4 → 1
store file formats read automatically

Under 2 sec
to build the full report, down from half a day

486
live Excel formulas, zero errors

29
stock alerts raised in the first run

Kora Home — Weekly Sales Report

Week starting 12 Oct 2026 · compared with week of 05 Oct · sample project, simulated data

This week 2026-10-12 ← *input cells: change to any week present in Data*
Last week 2026-10-05

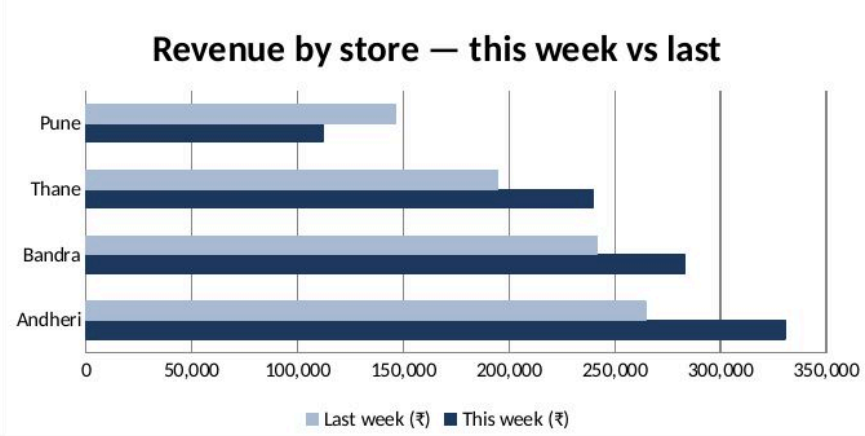

KPI	This week	Last week	Change
Revenue (₹)	965,244	847,090	+13.9%
Units sold	1,766	1,480	+19.3%
Bills (lines)	1,465	1,219	+20.2%
Avg value per line (₹)	659	695	-5.2%

By store

Store	This week (₹)	Last week (₹)	Change	Share of revenue
Andheri	330,492	264,575	+24.9%	34.2%
Bandra	283,341	241,471	+17.3%	29.4%
Thane	239,554	194,474	+23.2%	24.8%
Pune	111,857	146,570	-23.7%	11.6%

By category

Category	This week (₹)	Last week (₹)	Change
Bath	76,758	90,373	-15.1%

THE CHALLENGE AND THE METHOD

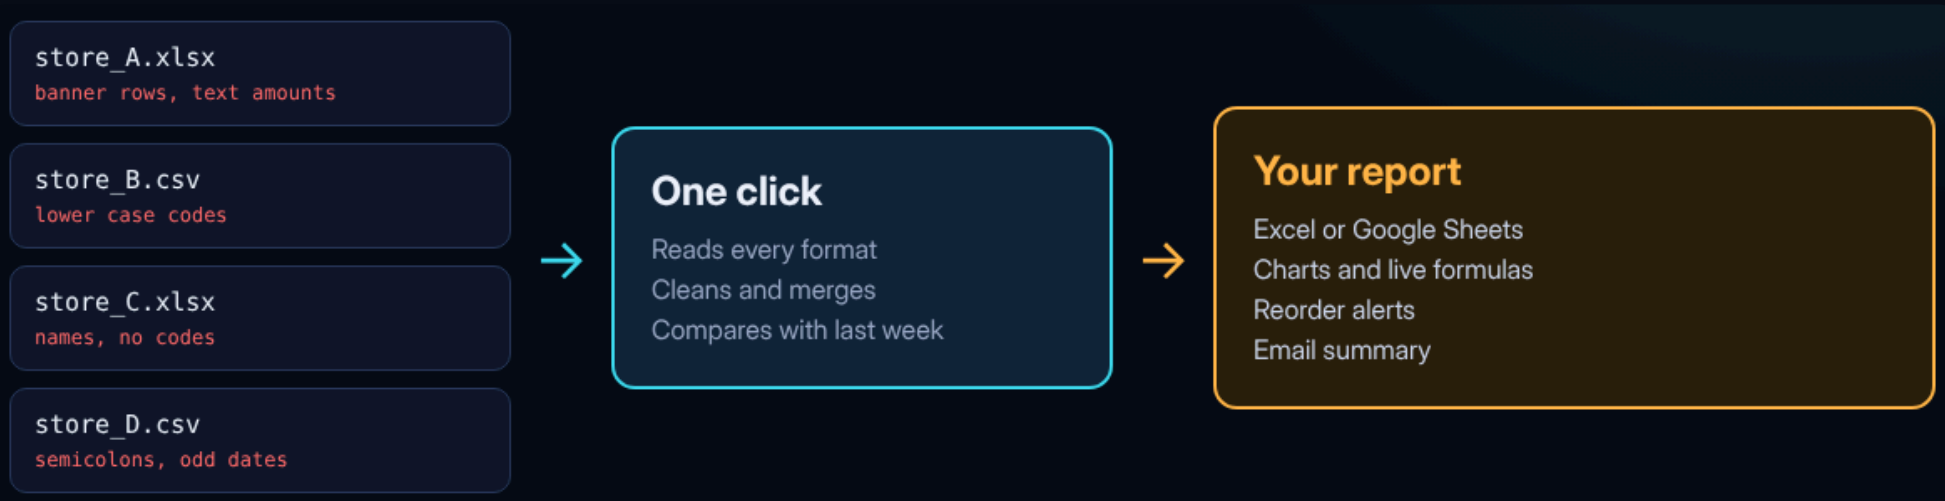

Four formats in. One clean report out.

WHAT EACH STORE SENT

STORE FILE	PROBLEM
Andheri_POS.xlsx	Item codes, real dates (the easy one)
bandra_sales.csv	Item codes in lower case
THANE store report.xlsx	3 banner rows above the header, product names instead of codes, amounts as text
pune-export.csv	Semicolon separated, DD.MM.YYYY dates

WHAT I BUILT

- A Python script with one small setup block per store, so adding a store takes minutes
- Cleaning: codes standardised, names matched to codes, text amounts converted, dates parsed
- Comparison with the previous week, automatically
- A formatted Excel report with live SUMIFS formulas, so changing the week cell recalculates everything
- A data log listing every format problem fixed
- Can be scheduled weekly, or rebuilt in Google Sheets with Apps Script

WHAT THE OWNER RECEIVES

A report that says what to do next.

To: Owner, Kora Home
Subject: Weekly summary · week of 12 Oct

Revenue ₹9,65,244 ▲ 13.9% vs last week, from 1,766 units.

- **Fastest growing:** Decor +95% ; weakest: Cookware −15%.
- **Store to watch:** Pune −23.7%, the only store that declined.
- **Best seller:** Brass Diya Set, ₹89,358.
- **Stock:** Brass Diya Set is out of stock at Bandra; 28 more items need reordering.

Reorder alerts

threshold: 7 days of cover

STORE	ITEM	STOCK	DAYS LEFT	STATUS
Bandra	Brass Diya Set	0	0.0	OUT OF STOCK
Andheri	Brass Diya Set	11	1.9	REORDER
Thane	Cotton Table Runner	2	2.3	REORDER
Andheri	Copper Bottom Pan	1	2.3	REORDER
Pune	Cushion Cover Set	1	2.3	REORDER

Summary sheet

KPIs, store and category change vs last week, red and green flags on any move over 5 percent, two charts.

Reorder alerts

Days of stock cover per item per store. Anything under the threshold is flagged, and the threshold is an editable cell.

Email summary

Four lines the owner can read in 30 seconds: revenue, fastest growing, store to watch and stock issues.
